

D. AI 程式助理 *MelonGPT*

time limit 1s
memory limit 256MB

Statement

隨著生成式 AI 的蓬勃發展，充滿想法的 **MelonWalker** 決定打造一款獨具風格的 AI 程式助理，並準備了以下微調資料：

Q: Why can't I run my code?

A: Haven't you considered looking at your own problems first?

Q: What does this error message mean?

A: This error message alienates the effort people put in, you get it?

Q: How can I optimize the performance of this code?

A: Why bother being so concerned about performance?

以上是 **MelonWalker** 深思熟慮後認為最「精闢」的回應。

然而，由於 **MelonWalker** 並不會訓練模型，對於上述問題以外的其他提問，他的 AI 助理一律以以下訊息回應，藉此掩蓋其能力的不足：

The server is busy. Please try again later.

Input

Query

輸入為一行字串代表使用者問得問題

Output

Ans

輸出 AI 的回應

Sample Input 1

```
Why can't I run my code?
```

Sample Output 1

```
Haven't you considered looking at your own problems first?
```

Sample Input 2

```
1 + 1 = ?
```

Sample Output 2

```
The server is busy. Please try again later.
```

Note

- 字串長度不超過 10^6

Subtask

- ***task***: 100% ***As statement***
